

“And once again, this year’s award for outstanding excellence in colour filters goes to Lee.”

It hasn't happened yet – but if ever they hand out awards for filters, we'll be there. Year after year, Lee Filters are involved in the cinema, theatre and TV industry's biggest successes. And you don't have to look far for the reason why. Lee are the world's largest manufacturers of colour correction/effects and lighting filters.

We got there simply by making the world's best filters. Filters that are more stable, more precise and more durable than any others.

The result of non-stop technological advance, using the most sophisticated equipment and materials available. Backed by a delivery service that leaves nothing to be desired.

Contact us direct for your free colour media swatch book and details of your nearest distributor.

LEE FILTERS

Anything else is second best.
