Gamma control desks and dimmer systems from EFS Celco

Most memory desks have no manual back-up... **The Gamma range has manual control over all channels and presets.**

Most manual lighting desks have a clumsy pin matrix... **The Gamma range has a microprocessor with battery back-up.**

Most effects desks have limited set chase patterns... **The Gamma range has a programmable operator-designed chaser.**

There are three standard desks in the gamma range...

300D 30-channel, 2-preset, 40 real-level memories, 4 x 40-step chase sequence memory.

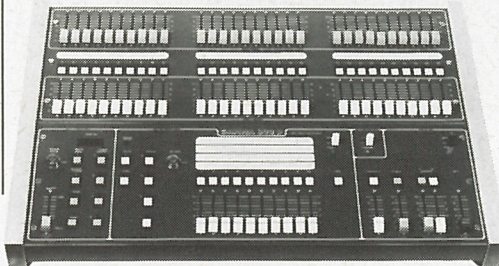

600D 60-Channel, 2-preset, 300 real-level memories, 8 x 100-step chase sequence memory.

900D 90-channel, 2-preset, 450 real-level memories, 8 x 100-step chase sequence memory.

Applications invited for trade distributors

A range of 6 and 12 channel dimmer modules, mains and signal patches and mains inlet and distribution panels are available for touring or permanent installation.

All dimmer modules incorporate magnetic circuit breakers and lamp condition indicators and can handle inductive loads.
