

ACT 6

...seen one?

You should — because this versatile, lightweight pack of six 10 amp dimmers is just the job for so many performance lighting needs! It has its own built-in control panel for local operation, and it's also compatible with Strand's range of remote control desks. For extra control facilities there is a multiplex version which requires only a single 2-core cable between all dimmers and operates with Tempus M24 or Gemini memory control systems. ACT 6 could be **your** scene — get the details now.

- 5 amp, 15 amp or European Schuko outlets
- Meets all international safety standards
- Integral carrying handles/fixing brackets

To find out more, complete the coupon and send it to Bill Crisp, Strand Lighting, FREEPOST*, PO Box 51, Great West Road, Brentford, Middlesex TW8 8BR. or 'phone 01 560 3171.

Please send me full information on ACT 6 dimmer packs.
