

STRAND CYCLORAMA LIGHTING

CYCLORAMA GROUNDROWS—SINGLE OR DOUBLE ROW
PATTERN "S" FOR 60, 100 OR 150 WATT LAMPS

These groundrows are designed for illumination of cycloramas or backcloths, from below, as an auxiliary effect to the top lighting. They have compartments spaced at 9-inch centres, and give more light from fewer lamps than the old 6-inch centre types which they supersede. The "Sunray" silvered glass reflectors give wide angle beams free from hot spots, and light well up the cyclorama or backcloth, even when placed as close as 3 feet. They are made in single and double row types, the latter being used when it is necessary to double the number of compartments allocated to blue, e.g. for large cycloramas.

SPECIFICATION

Housing is constructed in 20-gauge sheet steel, efficiently ventilated, with pressed steel compartment divisions welded in place at 9-inch centres, and the whole is finished in black crystalline outside and matt black inside. Each compartment is fitted with a metal frame with guard wires to take the colour medium and a type A.235 "Sunray" glass reflector mounted in a spring-steel spider and Edison Screw lampholder. Groundrow is manufactured in 3-foot and 6-foot lengths.

Mounting.—Substantial steel brackets are fitted at the ends of each length, giving variable tilt. Sections in the double row type may be tilted individually. Locking handwheels are fitted at each end. Swivel castors (as illustrated) are supplied as an extra on the single row type. They are supplied as a standard part of the double row type. Connectors are not included.

Wiring, which is housed in a sheet-metal trough with removable lid, is carried out in fireproof cable for colours and circuits to suit requirements.
