

FLOODLIGHTS

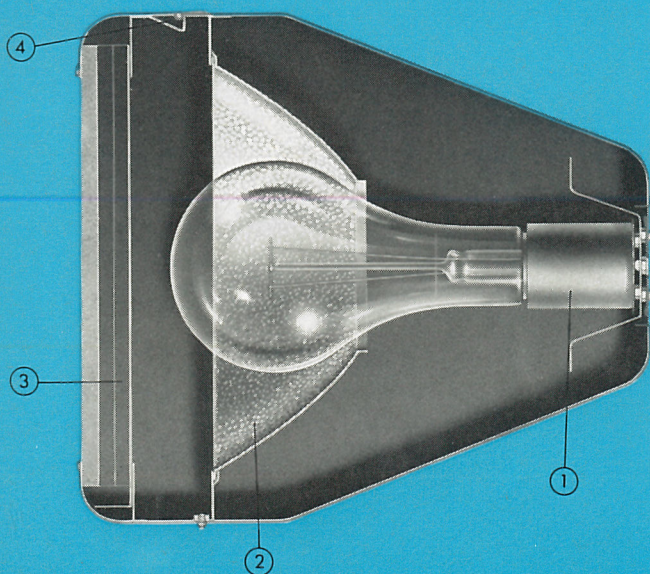

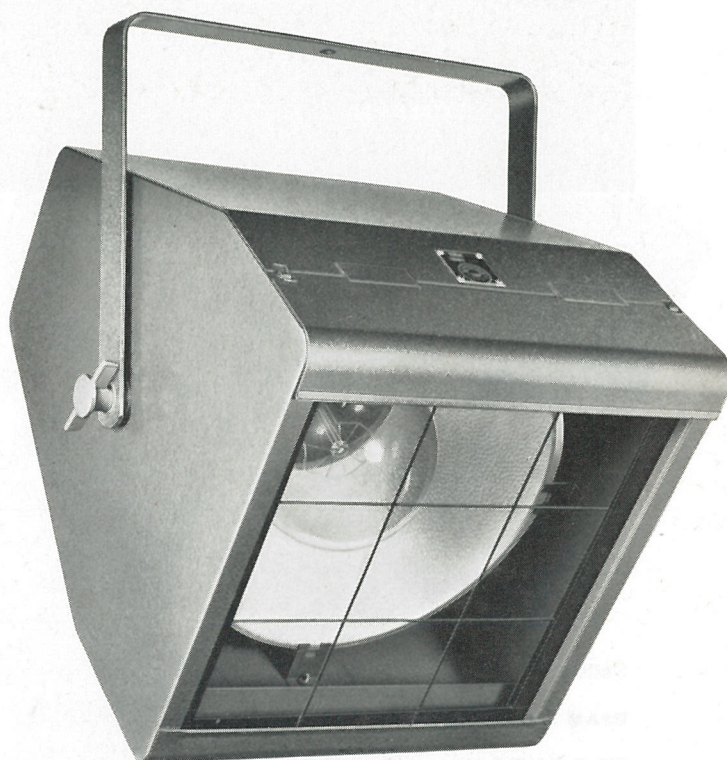

Patt 60 300/500 Watt

This floodlight provides a wash of light over a large area. A single or double row of these units are recommended for even colour lighting of a flat cyclorama in a small or medium sized theatre.

Some single units should be available as portable equipment for lighting door and window backings on all but the smallest of enclosed stages.

Other applications include sidelighting of vertical-fold curtains in cinemas and clubs.

1. G.E.S. porcelain lampholder
2. 10½-in dia. etched anodised aluminium reflector
3. Double colour frame runners within the housing
4. Spring closed hinged lid
