Patt. 252 Effects Projector

4000-watt  
Patt. 152 Effects and Patt. 752 Scene Projectors

## TUNGSTEN HALOGEN LAMPS

American tungsten halogen "Quartz Iodine" lamps are made in suitable types to fit most Strand units when used on 120 volts and may be used in direct substitution for orthodox tungsten lamps. These can be supplied for use as pairs in series or suitable transformers provided. In Europe at present only a few suitable high voltage lamps of this type are available.

MAIN ITEMS ONLY ARE SHOWN. DETAILED AND ILLUSTRATED DATA SHEETS WITH FULL SPECIFICATIONS ARE AVAILABLE FOR ALL EQUIPMENT
