300 Series Consoles *Exceptional performance and value*

Designed to meet the needs of a wide range of facilities, the 300 series consoles are available in seven formats. Systems beginning with the 24/48 and 48/96 memory manual desks and progressing through the 125 and 250 channel memory consoles are designed for small to medium facilities. Larger venues will appreciate the 400 and 600 channel memory consoles with integral LCD monitors and full network support as standard features. The 120 submaster model with 600 control channels will meet the requirements of operators who need extensive "hands on" flexibility. The features of our powerful 500 Series control consoles have been extended to the 300 Series and all operations are fully compatible. All Strand consoles use the proven Genius Pro/Lightpalette operating software offering support for Preset or Tracking Style operation for the first time in a small to mid-range console. SMPTE and Midi control may be added through a plug-in card for plug and play operation.

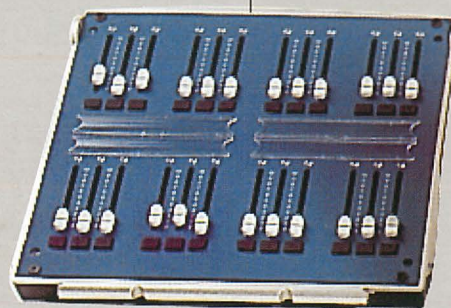

CAT. NO. 91701
24/48 Manual Console

The completely modular construction of all 300 Series consoles allows the control surface to be arranged to meet the needs of any operator. Ergonomically designed fader knobs and backlit keys provide an intuitive user interface. The on-panel LCD display provides function key labeling and is backlit for maximum readability. The innovative S-Buss control wiring technology interconnects fader panels and the system processor for reliable communication and operation at distances of up to 100 meters. Now for the first time fader panels may be remoted from the console to assist in programming and facility operations in a variety of applications from the theatre to television studios.

CAT. NO. 91703
125 Channel
Memory Console

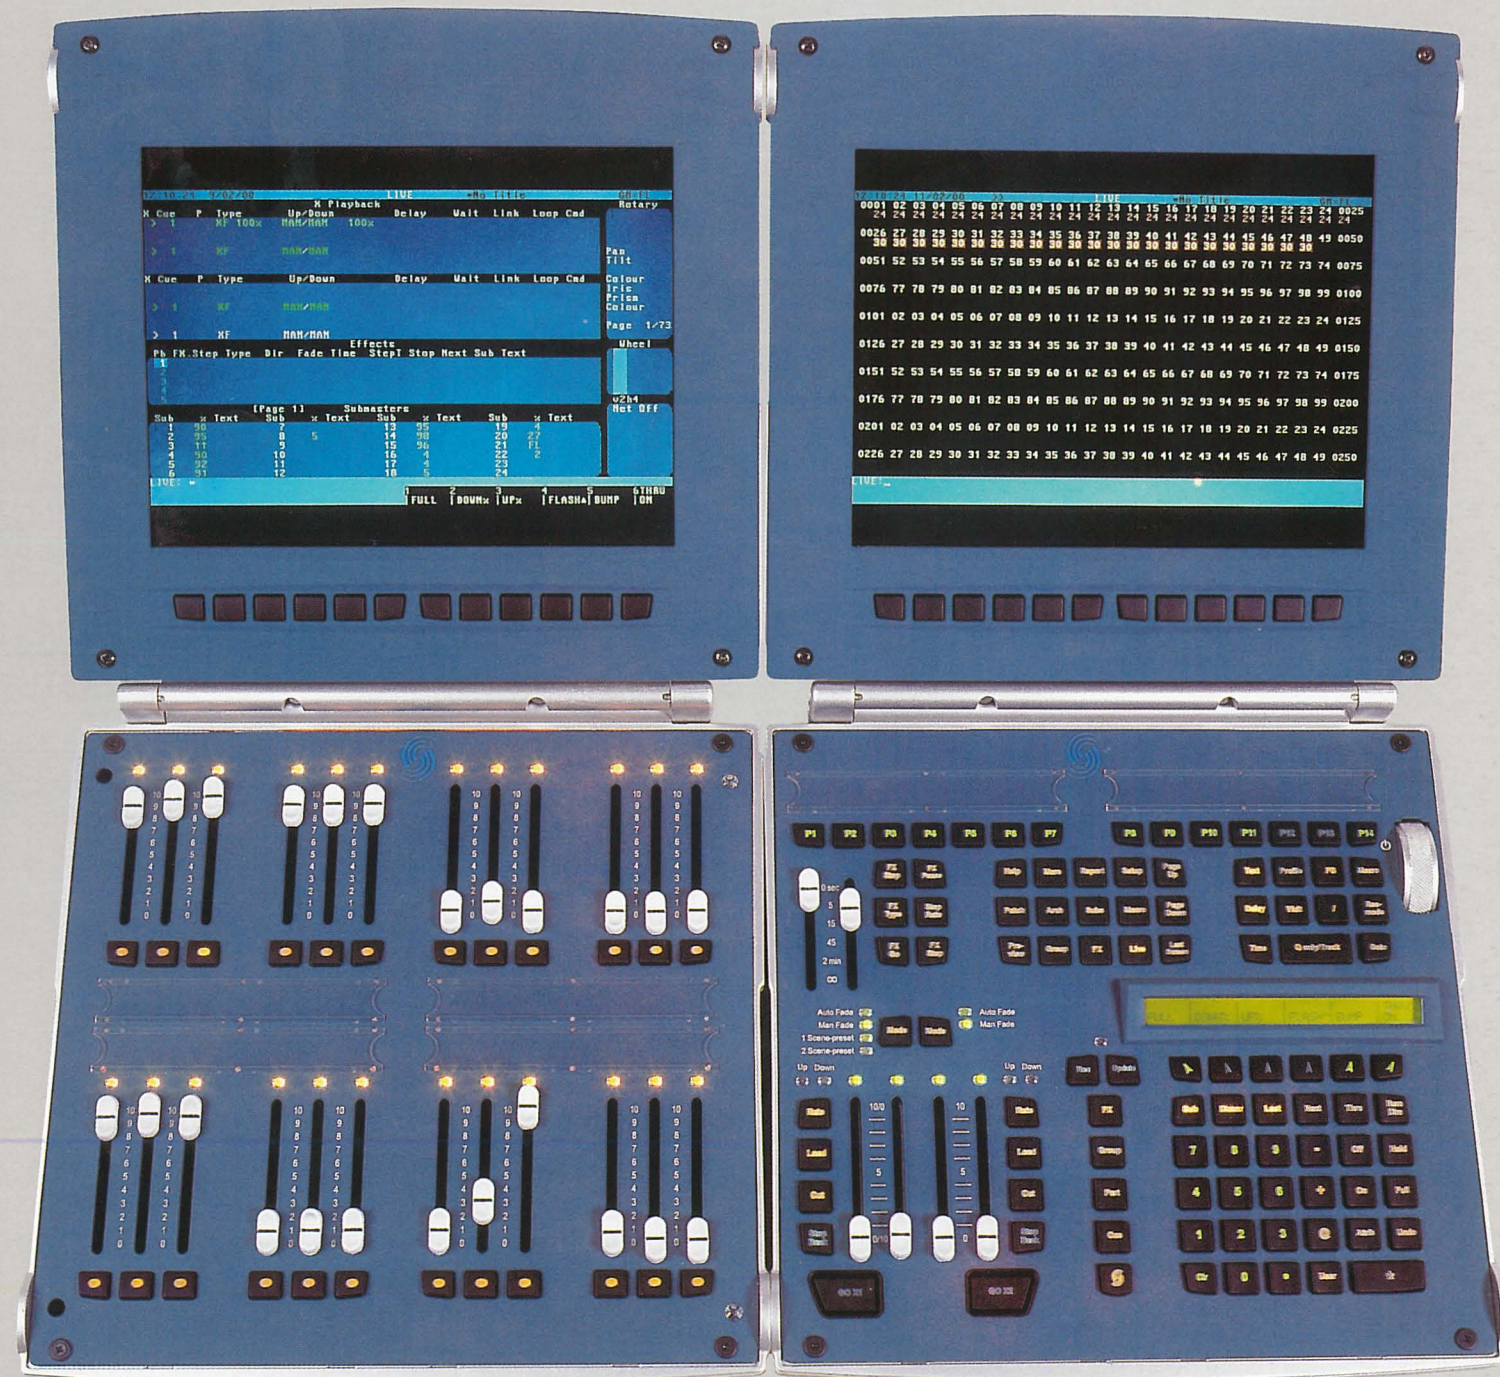

CAT. NO. 66300 Fader Module

Motion control is fully implemented in all 300 series consoles using our Intelligent Trackball/Mouse. Genius Pro/Lightpalette software includes: fixture libraries, preset focus groups and digitizer support.

Available as an option on all models, high resolution LCD displays are standard on the 400/600 Memory versions

CAT. NO. 91705
400 Channel Memory Console

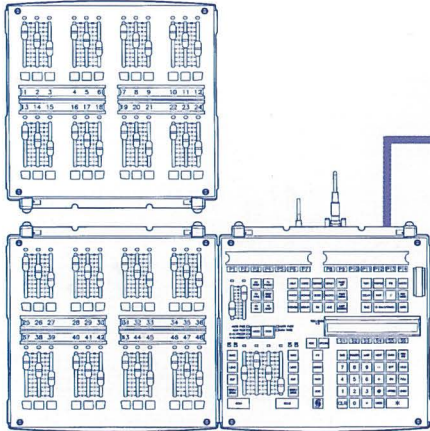

Controls feature sealed backlit keypads for optimum performance under any light condition.

300 Series Console Flexibility

The flexible modular construction allows controller panels to be configured for optimum operation. Modules may be arranged in any format and may be separated by up to 100 meters.
