300 series Control Consoles

All two tier consoles feature a unique folding design to simplify handling and storage. Touring companies will appreciate the reduced packing space that this feature offers.

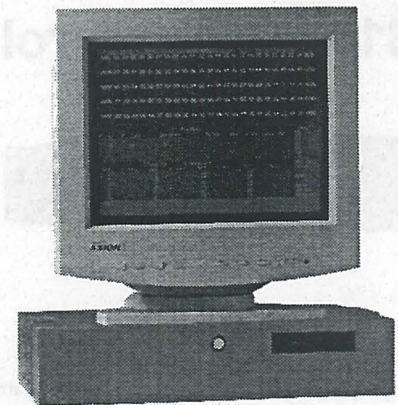

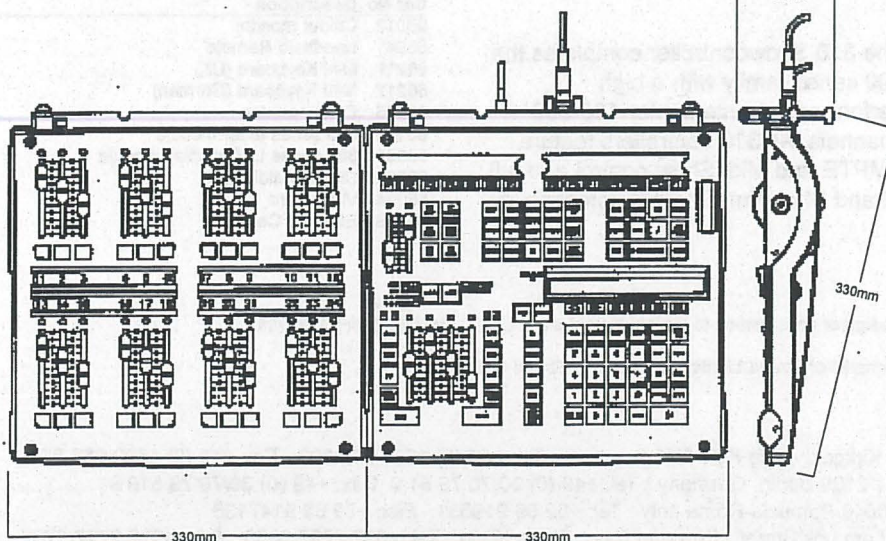

Designed to meet the needs of a wide range of facilities, the 300 series consoles are available in seven formats. Systems beginning with the 24/48 and 48/96 memory manual desks and progressing through the 125 and 250 channel memory consoles are designed for small to medium facilities. Larger venues will appreciate the 400 and 600 channel memory consoles with integral LCD monitors and full network support as standard features. The 120 submaster model with 600 control channels will meet the requirements of operators who need extensive hands on flexibility.

300 Series 24/48 Cat. No. 91701

- Modular construction for fully flexible layout. Modules may be arranged to meet any control room layout or operator requirements
- Unique folding design on two tier consoles
- Powerful Pentium class processors provide performance and reliability
- Wide range of memory and memory with manual versions available
- ShowNet Ethernet functionality available on all models
- Full support for automated lighting
- Compatible with 500 series consoles
- Wide range of accessories

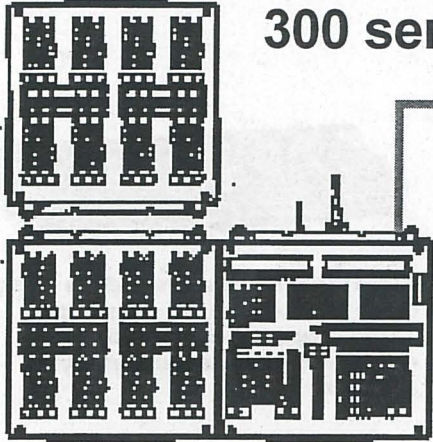

All Strand consoles use the proven Genius Pro/Lightpalette operating software offering support for Preset or Tracking Style operation for the first time in a small to mid range console. Motion control is a standard feature of the 300 series and is fully implemented using our Intelligent Trackball/Mouse support.

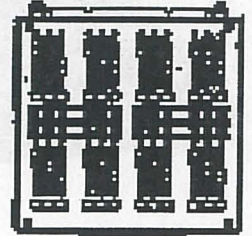

The processor module is the heart of any 300 series control system. Offered in a wide range of channel capacities and features, all processor modules can be easily upgraded. Powered by Pentium class processors, the 300 series controllers offer the performance operators have come to expect from Strand Consoles.

300 series Control Consoles

The flexible modular construction allows controller panels to be configured for optimum operation. Modules may be arranged in any format and may be separated by up to 300 feet.

Remote fader modules are fully supported with all 300 series consoles. Modules are connected to the system processor using low cost Category 5 cable.
