## Strand Control Systems

### Introduction

At last, the next generation of Light Palette consoles has arrived. Based on our powerful Palette OS with its direct action point and click graphical interface these new consoles offer control to meet productions of any size. Systems are available from 1500 to 8000 channels with over 32,000 DMX outputs providing exceptional range and control.

Light Palette has a powerful web browser that lets you configure and monitor your network and interact directly with Strand's

award-winning C21 and EC21 dimming systems. Right there on the console screen. And Light Palette is an elegant and highly functional lighting console, leveraging industry-standard technologies making it easy to communicate with other cool products (and not just ours) over the network. Whether you want to visualize your show with WYSIWYG or run a PowerPoint projection Light Palette connects quickly and easily.

And Palette's brain is a rugged industrial PC with a powerful

Dual Core processor that could be swapped in seconds if you ever needed to. Which you most likely wouldn't. Palette has an 80 gigabyte hard drive, or you can save your shows anywhere on the network. You even get a

USB key for show storage over sneakernet. On us. How cool is that?

PaletteOffline™ runs in Windows and can import Strand 300 and 500 series show files, so you can mix, match and swap to your heart's content.

### Ordering Information

Cat No	Description
91816	Light Palette Classic 1500 Console
91817	Light Palette Classic 3000 Console

### Peripheral Equipment

66147	Symbol 19" Rack Mounting Wireless Access Point and Switch Kit 120v
66149	PDA Kit and Rack Mounting Access Point (66146 + 66147 combined)
