## Major Borderlight Improvements

Many Exclusive Features

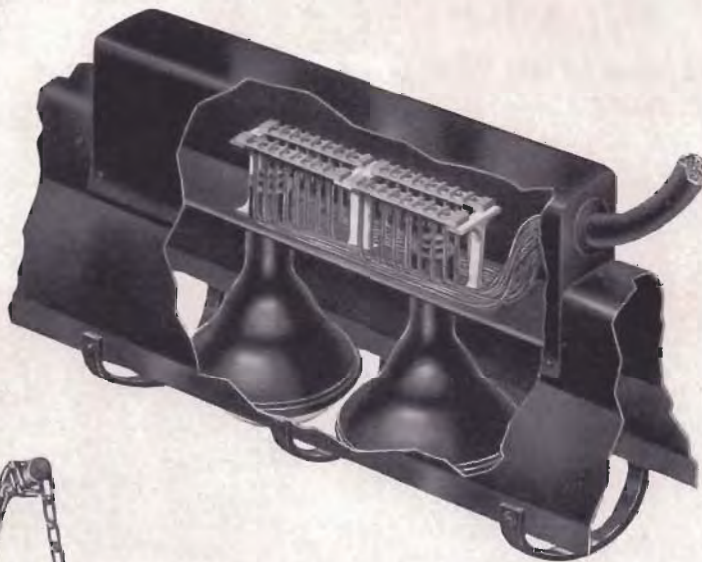

### 1st—New Terminal Strip Splice Box

A superior type of wiring box wherein the terminal connections may be quickly and easily attached to all circuits. A great convenience and time saver. This eliminates soldered and taped joints and affords a simplified arrangement for testing or changing.

### 2nd—Chain Hangers

These allow borderlights to be tilted for direction of light beams.

Note heavy reinforced construction in all Major borderlights.

### 5th — The Patented Major Slip Retaining Rings

Use either roundels or gelatine frames, making relamping very simple as the use of one hand only is necessary.

### 3rd—Anti-fouling Guards

Heavy guards protect glass and prevent drops from becoming fouled.

### 4th—Major Alzak Reflectors

Reflectors of Major Alzak are more efficient, having the highest reflective power of any known practical medium.

This is the finest type of reflector ever designed for borderlights. It is made in various sizes and shapes.

### 6th—Heat Resisting Roundels

Natural colored heat resisting molded glass roundels made by a special process are safe from heat breakage. Major roundels are only of genuine heat resisting and diffusing glass in natural colors and of convex shape.

## Borderlights—ALZAK Reflectors

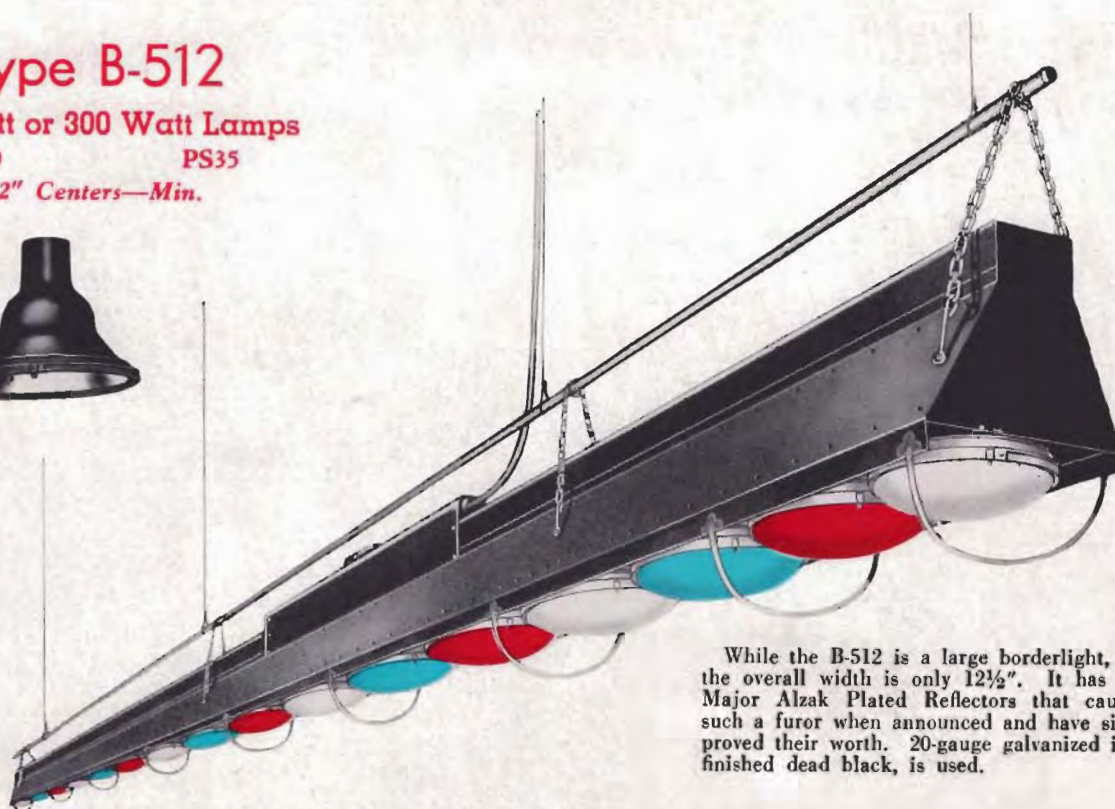

### Type B-512

500 Watt or 300 Watt Lamps

PS40

PS35

12" Centers—Min.

While the B-512 is a large borderlight, yet the overall width is only 12½". It has the Major Alzak Plated Reflectors that caused such a furor when announced and have since proved their worth. 20-gauge galvanized iron finished dead black, is used.

**F**OR large theaters and where volume of light is appreciated.

Not so many years ago this size borderlight would be considered huge, but the "profits-at-the-box-office" knowledge has proved that investment in light pays.

Major development brings this new unit to a high efficiency, getting a volume of light on the stage that makes every performance sparkle. It's a big borderlight for a big job.

### LIST PRICES

**Cat. No. B-512—Borderlight.** Furnished complete with new moulded mogul sockets, properly wired for colors and circuits, with terminal connection block (as specified) including chain hangings, and one glass roundel (any color) for each reflector. The new Major Slip Ring is a part of the reflector. Shipping weight, 22 lbs. per ft., **List Price, Per Foot, \$17.00**

Above price does not include lamps, gelatine, pipe batten, strain insulator, flexible borderlight cable or rigging of any kind.

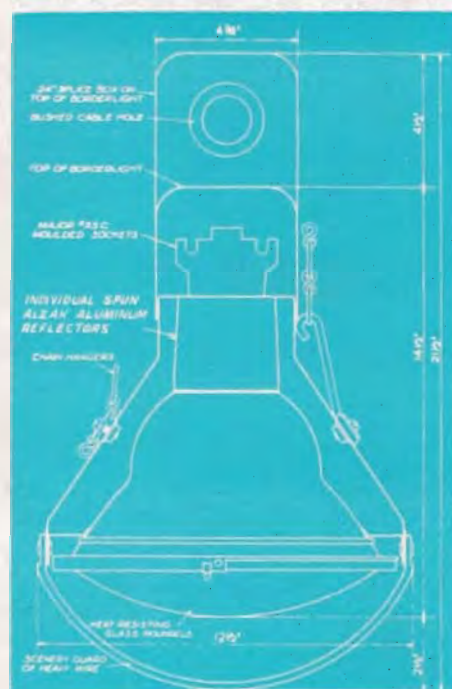

Extra heat resisting convex shaped diffusing glass roundels, clear, blue, amber, red, green, canary. **List Price, Each \$6.00**

Gelatine color frame. **List Price, Each \$3.00**

Imported Gelatine in 20" x 22" sheets, in colors. **List Price, Per Sheet \$1.00**

For furnishing and mounting special receptacle (for spotlight or upper worklight) and complete wiring of same on separate circuit, add **List Price, Each \$8.00**

**Special No. W-150** upper worklight unit for mounting on pipe batten with pipe clamp, including cable and plug for plugging in special receptacle in borderlight. **List Price, Each \$12.00**

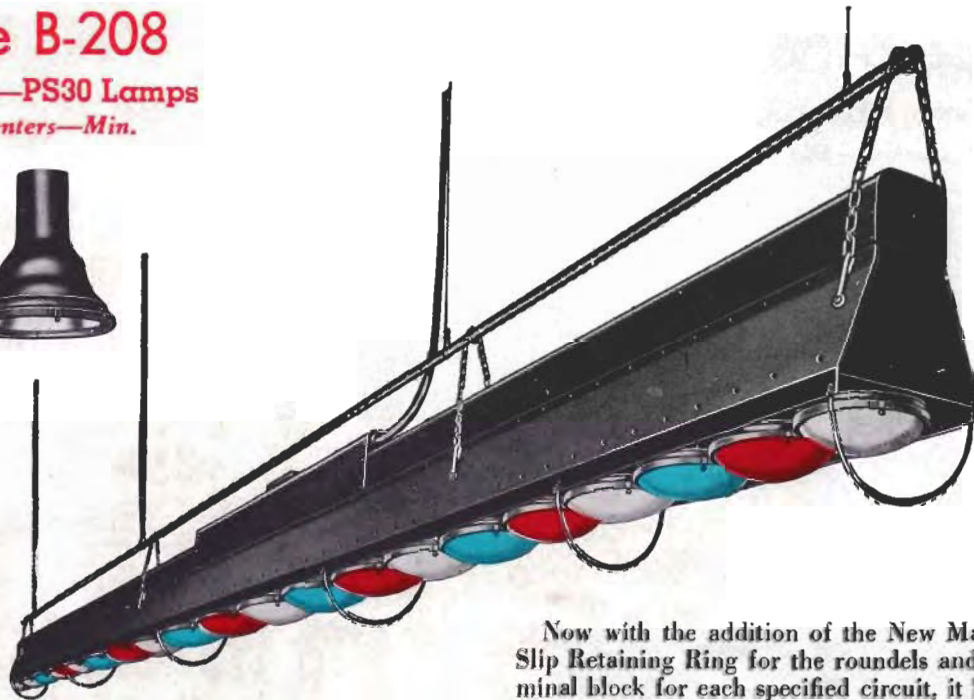

# MAJOR

## Borderlights—ALZAK Reflectors

### Type B-208

200 Watt—PS30 Lamps  
8" Centers—Min.

Now with the addition of the New Major Patented Slip Retaining Ring for the roundels and the new terminal block for each specified circuit, it has gained in value and effectiveness.

**P**ROBABLY more B-208 types of Major Borderlights have been installed than any other, for it has long been a popular and practical size for many theaters.

Dimensions and other data are given on this small blueprint. We will be glad to furnish a complete estimate for any borderlight job without obligation. Call in the Major district office man.

### LIST PRICES

**Cat. No. B-208**—Borderlight. Furnished complete, properly wired with new moulded medium base sockets for colors and circuits (per specification), with terminal connection block, including reflectors, chain hangings, and one glass roundel (any color) for each reflector. The new Major Slip Ring is part of each reflector. Shipping weight, 18 lbs. per foot.

**List Price, Per Foot, \$16.00**

Above price does not include lamps, pipe batten, strain insulator, flexible borderlight cable or rigging of any kind.

Extra heat resisting convex shaped diffusing glass roundels, clear, blue, amber, red, green and canary.

**List Price, Each \$3.00**

Gelatine color frame.

**List Price, Each \$2.00**

Imported Gelatine in 20" x 22" sheets, in colors.

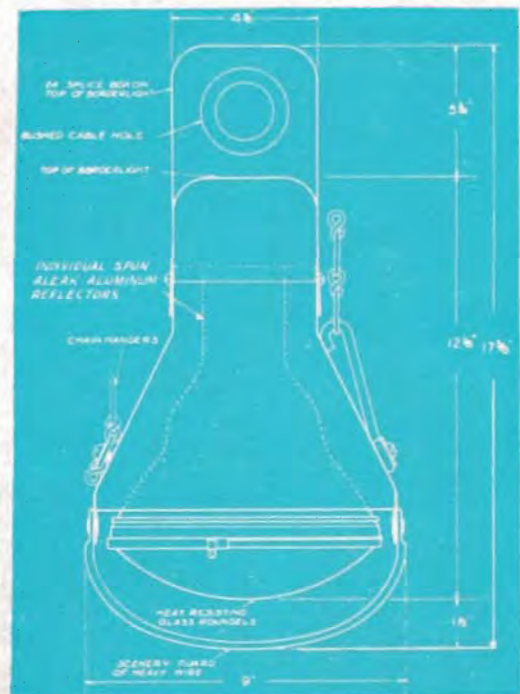

**List Price, Per Sheet \$1.00**

For furnishing and mounting special receptacle (for spotlight or upper worklight) and complete wiring of same on separate circuit, add

**List Price, Each \$8.00**

**Special No. W-150** upper worklight unit for mounting on pipe batten, with pipe clamp, including cable and plug for plugging in special receptacle.

**List Price, Each \$12.00**

# Borderlights—ALZAK Reflectors

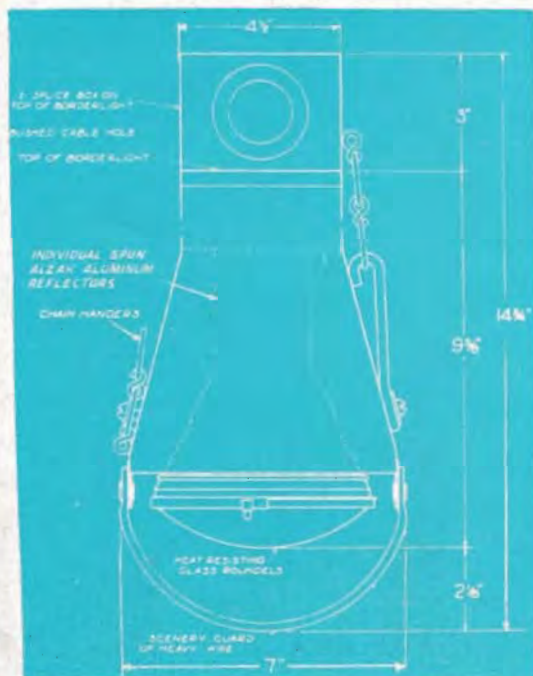

## Type B-156

150 Watt—PS25 Lamps  
6" Centers—Min.

**T**HIS is a medium-sized borderlight, but it is a very effective Major Unit Reflector Type. It has all the features and efficiency

of the B-512 and B-208, only being designed for smaller lamps. Note that this type shares the unique advantage of hanging only 5 degrees from the perpendicular, thus putting more light on the stage than any other make. The reflectors, of course, are ALZAK processed.

## LIST PRICES

**Cat. No. B-156—Borderlight.** Furnished complete with new moulded medium base sockets, properly wired with new terminal block for colors and circuits (per specification) including chain hangings and one glass roundel (any color) for each reflector opening. The new Major Slip Ring is part of each reflector. Shipping weight 15 lbs. per foot.  
**List Price, Per Foot, \$14.00**

Above price does not include lamps, pipe batten, strain insulator, flexible borderlight cable or rigging of any kind.

Extra heat-resisting, convex shaped, diffusing glass roundels, clear, blue, amber, red, green, canary.

**List Price, Each \$2.00**

Gelatine color frames.

**List Price, Each \$1.00**

Imported Gelatine in 20" x 22" sheets, in colors.

**List Price, Per Sheet \$1.00**

For furnishing and mounting special receptacle (for spotlight or upper worklight) and complete wiring of same on separate circuit, add

**List Price, Each \$8.00**

**Special No. W-150** upper worklight unit for mounting on pipe batten, with pipe clamp, including cable and plug for plugging in special receptacle in borderlight.

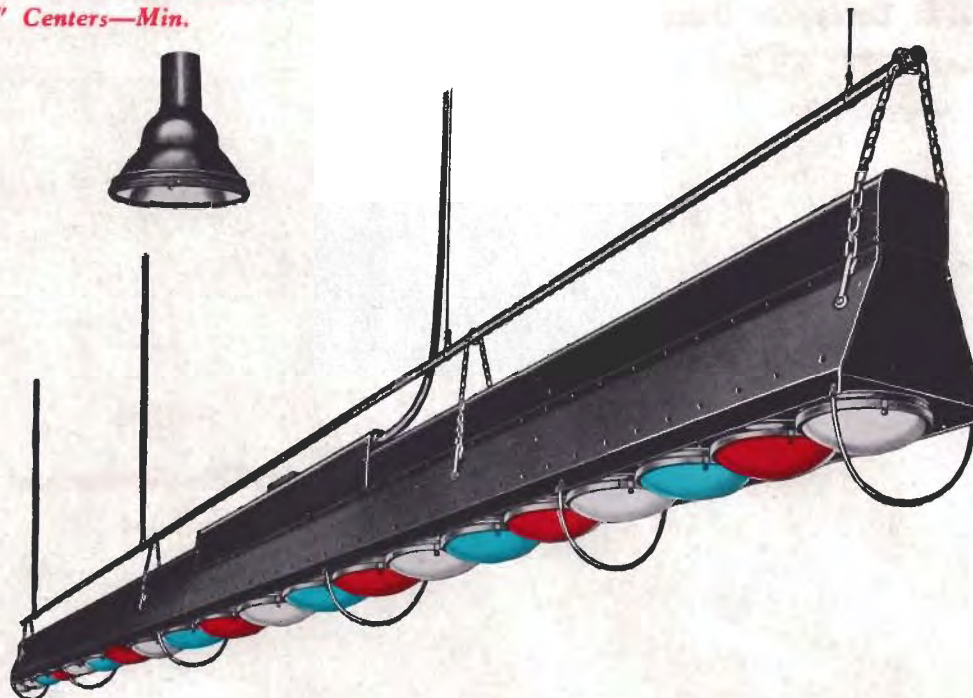

**List Price, Each \$12.00**

# MAJOR

## Borderlights Type B-106

100W or 75W A-21 Lamps

6" Centers—Min.

**T**HERE has been considerable demand for a Major Borderlight using 100W and 75W lamps, and we present herewith a small borderlight as fine in construction and design as the larger units. It has the new Major patented slip ring attached to ALZAK reflectors. This is a splendid borderlight where a minimum of wattage is desired.

### LIST PRICES

**Cat. No. B-106—Borderlight.** Furnished complete with new moulded medium base sockets, properly wired for colors and circuits (per specification) with new terminal connection block, including chain hangings, with one glass roundel (any color) for each reflector. The new Major Slip Ring is part of each reflector. Shipping weight, 14 lbs. per foot. **List Price, Per Foot, \$14.00**

Above price does not include lamps, gelatine, pipe batten, strain insulator, flexible borderlight cable or rigging of any kind.

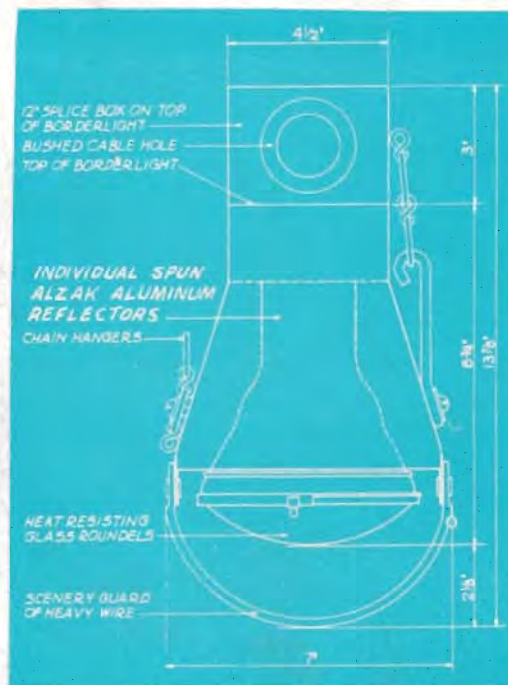

Extra heat resisting convex shaped diffusing glass roundels, clear, blue, amber, red, green, canary. **List Price, Each \$2.00**

Gelatine color frames. **List Price \$1.00**

Imported Gelatine in 20" x 22" sheets, in colors. **List Price, Per Sheet \$1.00**

For furnishing and mounting special receptacle (for spotlight or upper worklight), and complete wiring of same on separate circuit, add **List Price, Each \$9.00**

**Special No. W-150 upper worklight unit** for mounting on pipe batten, with pipe clamp, including cable and plug for plugging in special receptacle in borderlight. **List Price, Per Foot \$12.00**

# MAJOR

## Borderlights for Bare Lamps

**100W A-21 Lamps or Smaller**  
**4" Centers—Min.**

These bare lamp types are used less frequently than before the advent of the unit reflector types, yet Major engineers construct them as carefully as if they were a principal product.

The continuous double ALZAK plated reflector is not usually found on borderlights of this type, but is standard with Major.

**LIST PRICE—Borderlight**  
**Type B-103**

So much attention has been devoted to Unit Reflector Types that this new design for bare lamps is the first departure in years. Here is equipment that matches in construction the Unit Reflector Types and is very satisfactory where bare lamps are desired. This borderlight requires natural color lamps or lamps dipped for color effects.

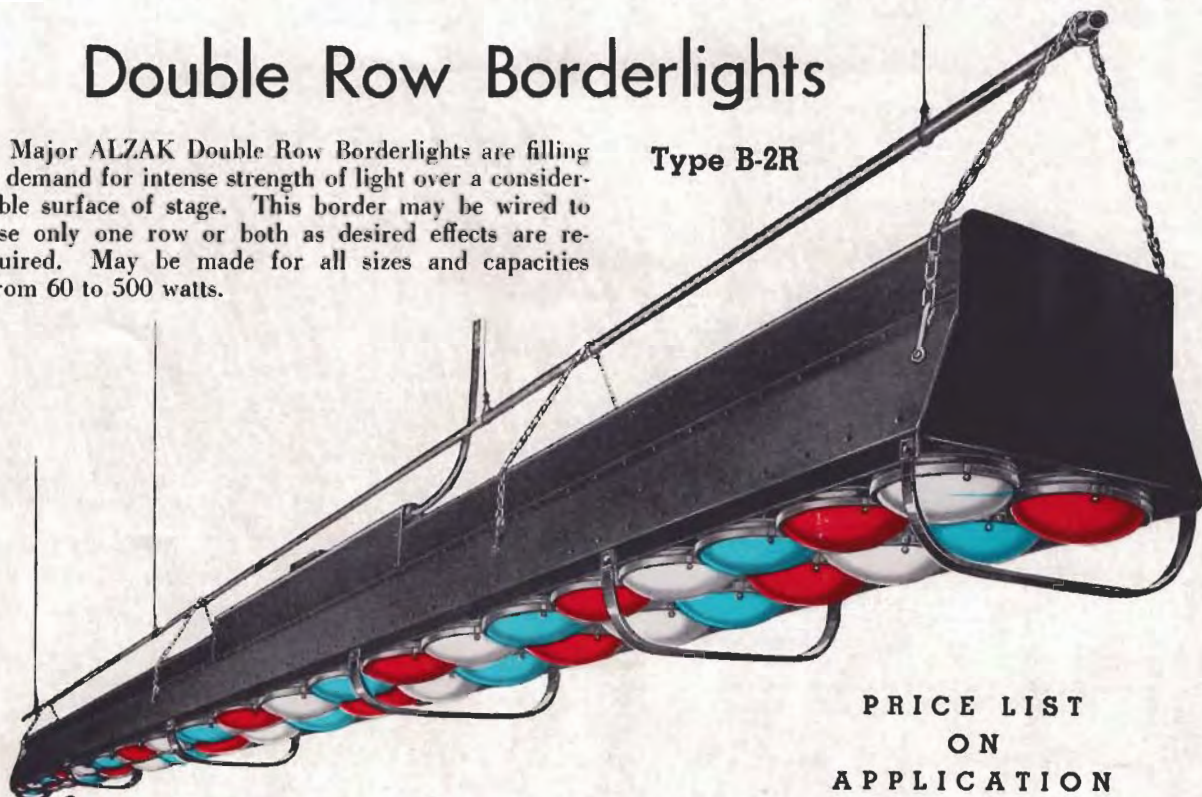

Bare Lamp Borderlight, complete with new Major moulded medium base sockets, properly wired for colors and circuits (per specifications) including chain hangers.

**Cat. No. B-103.....List Price, Per Foot, \$7.00**  
 Above price does not include lamps, pipe batten, or rigging of any kind. Shipping weight, 9 lbs. per ft.

## Double Row Borderlights

Major ALZAK Double Row Borderlights are filling a demand for intense strength of light over a considerable surface of stage. This border may be wired to use only one row or both as desired effects are required. May be made for all sizes and capacities from 60 to 500 watts.
