

# ACT 6+™ Dimmer Pack

- ❑ Six 10A 230V dimmers in a rugged, portable economical pack
- ❑ Ideal for temporary lighting rigs, or small installations
- ❑ Optional dual output sockets
- ❑ Analogue input accepts positive or negative control signals
- ❑ Optional plug-in DMX module gives multiplex control capability and integral chase effects feature
- ❑ Push-button test switch and “test on” indicator on dimmer
- ❑ Fuse “OK” LED indicator per dimmer
- ❑ Provision for wall mounting or 19" rack mounting

1. Reversible side plates for wall or rack mounting
2. Output sockets (2 per dimmer - optional)
3. 10A HRC fuses
4. Dimmer power indicators
5. Circuit test push button
6. Circuit test LED
7. Control signal input socket (+10V or -10V)
8. Blanking plate/optional DMX module
9. DMX input and output sockets
10. 'DMX OK' LED
11. DMX line termination switch and LED
12. Multiplex address switches (also used for auto-sequence function)

## Weights and Dimensions

Weight	Height	Depth	Width	Packed Volume
9.6kg (21.12lb)	188mm (7.4")	275mm (10.8")	483mm (19")	0.107m <sup>3</sup> (3.81cu ft)

## Mechanical data

**Finish/colour** Grey powder coat epoxy paint

**Construction** Sheet metal enclosure. Mounting brackets are formed into the side plates which are reversible for 19" rack (4U high) or wall mounting.

## Environmental data

<b>Temperature range</b>	0C - 35C
<b>Relative humidity operating range</b>	10% - 95%, zero condensation.
<b>Operating environment/ventilation</b>	Clean, dry ventilated space within temperature and humidity limitations.
<b>Standards compliance</b>	EN55014, EN50081-1, EN50082-1
<b>Ingress protection</b>	IP 20 (IEC529/EN60529)

**Electrical and operational data**

**Supply Voltage/Frequency**

200 - 260V, 48 - 62Hz  
 Three phase plus neutral and earth, or single phase plus neutral and earth. A phase link bar is supplied for single phase operation. Main power connector should be 60A or greater (single phase), 20A or greater (three phase). Recommended connector type: CEE 17 BS4343

**Total Capacity**

Maximum load 10A per dimmer - total 60A resistive (tungsten) loads only. Minimum load 60W per dimmer.

**Circuit Protection**

Each dimmer module is protected by a 10A HRC 'F' type 20mm x 5mm fuse.

**Control**

Analogue auto-sensing 0V to - 10V (full-on) via 10K resistor and silicon diode, or 0V to +10V (full-on) via 1K resistor and silicon diode. When DMX module is fitted, analogue and DMX512 Mux signal can function simultaneously, with the dimmer responding to the highest level.

**Connections**

Mains input cable up to 10 mm<sup>2</sup> can be inserted through a 32mm cable entry hole in the rear panel or in the left hand side, using a suitable cable gland. Cable termination is made to screw terminals. Load connections are made with individual plugs (maximum 2 per circuit if optional second sockets are fitted)

**Control Input**

Analogue 0V - 10V (+/-), via 8 pin locking DIN connector on front panel. DMX512 (1990) multiplexed digital control on DMX module faceplate. (Multiplexed control inputs are only available when the optional DMX module is fitted.)

**LED Indicators**

Indication of power available to each dimmer (fuse OK). When fitted with Multimux module LEDs indicate the presence of DMX multiplex signal and status of DMX line termination.

**Local Control**

Dimmer test switch sets dimmer 1 to a preset level of 60%. With the DMX module fitted auto-sequencing step and fading chase effects are preset and initiated by setting the pack address switches in the range 600 to 999.

**Cooling Method**

Internal heatsink provides adequate cooling in any well-ventilated position.

**Ordering information**

**Act 6+**

Compact dimmer pack with six 10A 230V dimmers controlled by 0V to 10V analogue signal (plus/minus autosensing) per dimmer or optionally, multiplex signals. All versions with analogue input. By removing a blank cover panel, and installing the optional DMX module, any dimmer pack can operate with DMX 512 multiplex signals. An added feature with the Multimux module is the self-powered effects package which provides 4 effect types, selection of channels in the effect and the effect speed, each one selected by the mux start address switches. All versions accept three phase power, and include a single phase linking strap.

**Cat No Description**

73310	Act 6+, single, 15A sockets	73388	Act 6+, dual, C17 sockets
73380	Act 6+, dual, 15A sockets	73320	Act 6+, blank
73312	Act 6+, single, Schuko sockets		
73382	Act 6+, dual, Schuko sockets		
73313	Act 6+, single, Schuko sockets, complete with mains cable	<b>Optional accessories</b>	
73383	Act 6+, dual, Schuko sockets, complete with mains cable	76332	DMX interface module, DMX512
73384	Act 6+, dual, French sockets	61107	6-way & master control desk
73316	Act 6+, single, Swiss sockets	66090	DIN8 2m control cable
73386	Act 6+, dual, Swiss sockets	66091	DIN8 5m control cable
73318	Act 6+, single, C17 sockets	66092	DIN8 25m control cable
		66083	DMX control cable, 2m
		66081	DMX control cable, 10m
		66082	DMX control cable, 25m
