## Pacific 14°-35° Zoomspot

**A base down axial profile delivering a “cool” beam of light with a beam range adjustable between 14° to 35°. The beam is a crisp “white” light with little or no distortion, ideal for pattern projection and precise beam shaping.**

NOTE: It is the same physical tube as the 12°-28° with a different optical arrangement to take the B size pattern. As the gate is wider, it makes more use of the available light, therefore a little more efficient.

### Features

Compact 14°-35° luminaire only 635mm long.

Cool light ‘white’ light. Over 80% of the heat is removed from the light beam by cold mirror and dissipated through the heatsink.

Base down lamp mounted axially in the reflector to maximise light collection.

Choice of 600W, 800W, 1000W or 150W MH or MSR 575W lamp modules (each supplied with 1m mains cable).

Accurate, simple & cool to use, lamp peak / flat adjustment.

Two pattern / iris mounting positions + rotatable lens tube.

Automatic disconnection of power on removal of lamp module.

Height adjustable yoke.
