

STANDS

The comprehensive Strand range of stands covers all theatre, studio and portable lighting applications.

The majority of stands are equipped to accommodate either 16mm sockets or 29mm spigots of studio luminaires. Multi-head stands have both types of fixings. Stands for theatre use are generally supplied with either a 29mm or a 19mm socket to take a range of spigot adaptors which are fitted to the M10 or M12 suspension bolt on the fork of the luminaire.

In the event of any problem in specifying the best stand and correct fitting for any application, Strand staff are ready to advise.

**Low stand**

Recommended for use with Minim, Prelude, Cantata, Punchlite, Nocturne (all require M.10 spigot) and Leko luminaires.

Folding cast-base stand

Recommended for use with Minim, Prelude, Cantata, Punchlite, Nocturne (all require M.10 spigot) and Leko luminaires.

**Tall double-extension stand**

Recommended for use with Minim, Prelude, Punchlite, Nocturne luminaires (all require M.10 spigot).

Model	Description	Item Number
Low stand	Low lightweight tripod stand, folding radially, with clamp for 19mm outside diameter plain or stepped shank spigot adaptor.	26 875 09
Folding cast-base stand	General purpose single extension telescopic stand with die-cast, heavy-alloy base.	26 896 09
Tall double-extension stand	Tall stand, of braced, but folding, construction with two extension tubes for high mounting of a lightweight luminaire.	26 898 0T
Folding braced stand	Adjustable height, braced stand providing rigid support, without excessive weight or bulk, for follow spots, effects, projectors etc.	26 897 04
Table stand	A lightweight circular stand. The base is drilled in three places to allow rigid fixing.	66 020 50
Mercury stand	Compact, lightweight, 4-lift stand of aluminium construction.	67 236 56
Spartan stand	Light alloy stand ideal for the 800W Redhead with all accessories, or similar lampheads.	67 257 56
Apollo stand	Compact stand ideal for use with the portable range of Quartzcolor lampheads.	52 052 04
Trojan stand	Lightweight tubular stand specifically designed for portable equipment.	52 005 04
Hercules stand (multi-head)	Folding stand with castors. Metal parts are chrome plated to protect against corrosion. As above, but without castors.	52 008 00 52 008 01
Atlas stand	A double-extension folding stand with braked wheels. Extremely sturdy steel construction suitable for the rigours of location working.	67 785 09
Goliath stand (multi-head)	Largest in the range of light alloy stands which accepts luminaires with 29mm spigot, ideal for 10kW tungsten and 4kW HMI spotlights.	52 069 0T
Samson stand	A heavy duty wind-up stand suitable for 10kW tungsten and 6kW HMI spotlights. Chrome plated to protect against the weather and supplied with braked wheels.	52 083 01
3-section wind-up stand (multi-head)	A 3-section pole; both of the two risers extend simultaneously at an elevation of 4.4cm per handle turn. Adjustable levelling on one leg.	52 087 00
Gladiator stand	A very heavy duty stand of steel construction with aluminium castings, suitable for all HMI spotlights up to 12kW, and arc lamps. The cranking system lifts both extensions simultaneously. The automatic clutch and safety break system prevents the stand from reversing under load. Supplied with braked wheels.	67 256 61

**Table stand**

Recommended for use with Megalux (requires adaptor 66 043 19), Pulsar, Mizar and ladi Fill luminaires.

**Folding braced stand**

Recommended for use with Cadenza, Cadenza EP (both require M12 spigot), Cantata Followspot (requires M10 spigot), and Solo luminaires.

**Mercury stand**

Recommended for use with Megalux (requires adaptor 66 043 19), Pulsar, Redhead and Mizar luminaires.

**Spartan stand**

Recommended for use with Megalux (requires adaptor 66 043 19), Pulsar, Redhead, Mizar and ladi Fill luminaires.

**Apollo stand**

Recommended for use with Redhead and ladi Fill luminaires.

**Trojan stand**

Recommended for use with Blonde, Bambino 1000W and Shaula luminaires.
