© STARDRAW 3D

At last, an affordable, fast, user friendly 3D CAD package designed specifically for lighting designers

Stardraw 3D is a powerful, standalone 3D Computer Aided Design package which runs under Windows 3.1 and enables designers to create stage sets, lighting designs, and detailed presentations. Included is a large library of lighting equipment and trusses, so you can quickly produce highly detailed plots. You can also use the built-in editor to create your own libraries.

30 DAY FREE TRIAL

We will send you a complete copy of Stardraw 3D absolutely free (excluding delivery). If you like it, keep it. Only after 30 days have elapsed will we deduct your credit card. If you are not completely satisfied, send the package back to us within 30 days and you will only be charged for the original shipping cost.
