

# “Oliver”

Four shots showing the set in different modes.

## Some notes about Bicester School Hall

Like so many halls, used for amateur production this has a flat – gymnasium – floor. Hence the use of rostra in nearly all scenes. The stage is 24 feet wide and 20 feet deep with a 7’6” wing space both sides.

Lighting equipment consists of a Mini 2 18 way desk with 5 amp dimmer modules, a good selection of elderly – but rewired – 23’s and 123’s, two Preludes and four of the original mains voltage small Mini Spots bought at a Brentford sale.
