

# CUE LIGHTING DIRECTORY

The Lighting Directory is divided into three sections covering Manufacturers, Distributors and Hirers.

The Manufacturers section is arranged in alphabetical order and gives the address, telephone number and broad categories of products manufactured by each company.

The Distributors section is not a list of official agents (although these are included) but a guide as to which products can be purchased from each distributor. The distributors in this section are arranged geographically by county and if a distributor appears in a county other than the one in which he is based this indicates that he serves this additional area.

The Hirers section is also arranged by county. Companies providing a nationwide service are listed under London. In addition to the address and telephone the name of the manager or contact is shown together with any services provided in addition to hire. Again companies listed in more than one area provide their services in these additional areas.
