**Little pictures**

MicroPatterns are now available from the Great American Market for use in MR16 Framing Projectors. They afford the designer an opportunity to use projected images in situations where larger, hotter stage fixtures are unfeasible, such as scaled-down stage and dance productions. Made of stainless steel, the MicroPattern has an outside diameter of 1 1/2" and the maximum design diameter is 1". THE GREAT AMERICAN MARKET, 826 N. Cole Ave., Hollywood, CA 90038, USA. 213/461/0200.

At an 8m throw the beam diameter is adjustable between 2.1 and 4.1 m. The Zoomspot 650 Wide has a beam angle, 22 - 40 degrees. At a 5m throw the beam diameter is adjustable between 2 and 4 m. SELECON NEW ZEALAND LTD, 40 Drake Street, Freemans Bah, Auckland 1, New Zealand, 09/792/583.

**Totally Mode-ern**

The Mode Wall Mounted Power Units are four channel, zero switched power packs, designed for reliable operation of all types of resistive and inductive load. The units operate as four channel effects switching units for non-dimmable lighting. MODE ELECTRONICS LTD., Chelsing Lodge, Tonwell, Ware, Hertfordshire, UK. 0902/462121.

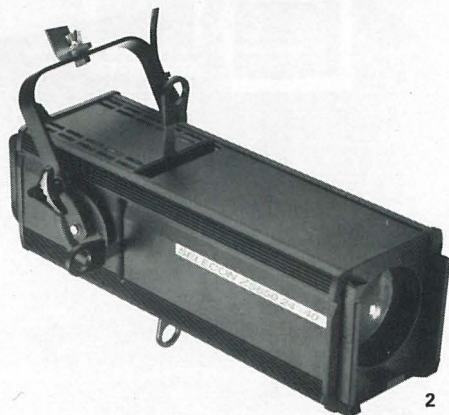

2

**Heavy duty lightweights**

A new range of lightweight 500/650 watt luminaires has been introduced by Selecon. The Zoomspot 650 has a beam angle, 16 - 30 degrees.
