

THE MICRO-ELLIPSE

Theatrical Technology For Architectural Use

Combine Altman's world-renowned quality with leading edge theatrical technology and the result is a breakthrough in lighting for architectural use!

Altman's UL listed MICRO fixtures, the tiny 8½" MICRO-ELLIPSE and the even tinier 4" MICRO-FLOOD, give visual style *and* performing quality to accent, general and showcase interior lighting.

Both MICROs feature

- extruded aluminum housing and die-cast components
- 75 watt solid state transformer
- track adaptability
- assorted brilliant anodized colors, stock or custom
- push-on two pin socket
- optional dichroic color filter assembly
- USA design and manufacturing
- free accessories—color frame and MR-16 lamp

The MICRO-ELLIPSE features

- variable focus without disassembly
- 2" optical system
- removable shutters
- special effects capabilities — picture cropping, pattern projection, pin spotting
- additional free accessories — circle templates and pattern holder

The Altman MICRO fixtures. Theatrical technology and renowned quality combined for architectural use.

What's in a Name?
Everything when it's ours.
