

# STRAND MAGAZINE LENGTHS

PATTERN "L" FOR 25, 40, 60 OR 100 WATT LAMPS

This magazine equipment is designed to be as compact and light in weight as possible in order that it may hang vertically or horizontally on framed scenery. The light dispersion is wide, particularly in the double sided model, free from hot spot, making it particularly suitable for lighting window and door backings. In small stages it will also be useful as footlight or as groundrow to light the bottom of cycloramas and backcloths at close range.

### SPECIFICATION

The housing is constructed in sheet steel, efficiently ventilated, with compartments at 6 inch centres and the whole is finished white reflection surface inside and black crystalline enamel outside. Each compartment is fitted with a B.C. lampholder and on one or two sides with runners each carrying one metal colour filter frame with guard wires. A hinged flap retains colour frames in position. Sets of vertical and horizontal keyhole slots are provided for wood fixing screws. Wiring is in heat resisting cable and terminates in 1 ft. tails.

### DIMENSIONS

of one- and two-sided lengths

	ft.	ins.
A .. .. .	3	0
B .. .. .	8	1/2
C .. .. .	4	1/2
