June 5th, 1963.

Mr. K. Wyndham,
69 Dumbarton Street,
Guelph, Ont.

Dear Mr. Wyndham:

Thank you for your letter of May 31st.

We do have several so-called baby spotlights such as the Pattern 23 and the Pattern 123 which you will find illustrated in the enclosed literature. However, these may be too large for your purpose. The only truly miniature spotlight we have is known as the Pattern 12 which again you will find detailed in the catalogue. This was originally designed for picture lighting and it does work on the mirror principle in that the beam can be shaped by means of built-in shutters. It is, as you will see from the Catalogue, very small and compact and may have some appeal.

Please let us know if we can be of any further help.

Yours sincerely,

STRAND ELECTRIC LIMITED

Philip Rose
