

'CINEMOID' COLOUR FILTERS

'Cinemoid' is the colour filter for all theatrical lighting purposes, either indoors or outdoors. 'Cinemoid' sheets are exceptionally durable being mechanically strong, impervious to moisture and self-extinguishing even after deliberate prolonged contact with a naked flame. The material complies with British Standard 3944; 1965 and has been approved by all the principal authorities throughout the world.

The wide range of colours available, illustrated below and overleaf, are identified by number as

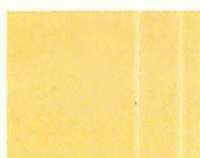

well as name. These illustrations are of necessity approximate as the quality of luminous colour cannot be fully reproduced by pigments on an opaque base. For the closest approximation these illustrations should be viewed under bright incandescent light rather than by daylight or by fluorescent lighting.

The trade mark 'Cinemoid' denotes a particular brand of self-extinguishing acetate sheeting which is made in England specially for use as colour filters and which is distributed throughout the world by The Strand Electric & Engineering Company Ltd.

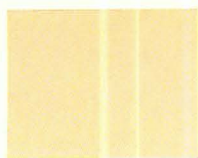

Ref. 267 Sheet $24\frac{1}{2} \times 21 \times 0.001$ -in ($620 \times 530 \times 0.25$ mm) Weight 4 ozs (113 grams)
Ref. 268 Sheet $49 \times 21 \times 0.001$ -in ($1240 \times 530 \times 0.25$ mm) Weight 8 ozs (227 grams)
