STRANDBOOK

Strand have designed the Strandbook to be a comprehensive catalogue of all Strand Lighting products, as well as a reference manual for anybody interested in stage and studio lighting.

To help you find a known product there is a brand name index at the back. Alternatively if you are not sure which product suits your needs turn to the relevant section such as stage, or television and browse through until you find what suits your requirements.

Each product has an item number which you will need to use when making enquiries or placing an order with Strand.

This item number corresponds to the separate price list.

For example to obtain the price of Minim 23, the item number is 22 310 0T, turn to the price list which is arranged in item number order until you reach the correct number. This will give you a price for Minim. Data sheets are available on all Strand and Quartzcolor luminaires, manual control desks, dimmer packs and racks, the smaller memory lighting systems, and associated accessories for both stage and studio use.
