

NOCTURNE &  
CODA  
FLOODLIGHTS/  
CYCLIGHTS

These complementary ranges of Flood/Cyc lights for linear halogen lamps, provide a choice of symmetrical or asymmetrical light distribution. Nocturne has a symmetrical distribution with extra intensity in the centre for more directional lighting or increased throw. Coda has an asymmetrical light distribution which ensures even colour wash when mounted close to the top of a Cyc or Backcloth. Nocturnes are available as single units only in either 500W or 1000W ratings, whilst Coda is available with a rating of 500W, in single, triple and quadruple units.

NOCTURNE 500  
MkII 500W
