

# Hui Work Light

**For overstage, rehearsal lighting the Hui Work Light provides a compact 90° flood beam.**

The fixture is equipped with a wire safety mesh instead of safety glass which allows the air flow system to work in any position for extended operating hours.

This model is not suitable for use with plastic color filters; there is no color frame supplied.

## Features

The Hui Work Light uses the FCL 500W, EHM and EHZ 300W 4 11/16th" lamps.

Re-lamp without having to break focus.

Shape the beam and contain glare with the four way accessory – fits all models.

Permanently attached safety cable ensures that this important safety requirement is always on hand.

Integral micro-switch provides automatic disconnection of power to the fixture when opening to relamp, preventing a student or technician inserting a lamp into an electrically live fixture.

Three year warranty.

## Approvals

ETL / cETL listed to UL 1573.

## Physical Data
