

# Light Curtain 560

DAVID HERSEY ASSOCIATES LTD 15, Between Streets, Cobham, Surrey. KT11 1AA.

Telephone: Cobham 7117

The 'Light Curtain 560' has been designed and manufactured by DHA to meet the demand for an extremely narrow and intense curtain of dense light.

The units are 2.5 metres in length and designed to be used in pairs, butted end on end. Each unit comprises 10 lamps rated at 12v and 240 watts, and when connected in pairs require a 240 volt supply.

The special PAR type of lamp units, under normal conditions, will have a life of 2000 hours.

Full length barn doors, with lock off facility, will close completely over the lamp units, thereby protecting them during transit.

We will be pleased to demonstrate the use of a LIGHT CURTAIN 560 which will show the dramatic effects capable from its very narrow high quality light source quite unlike normal PAR battens.
