

AUDIO PLAYBACK & SHOW CONTROL SOFTWARE

# create richer sound designs

## EASY TO CREATE AND OPERATE

Easy to create and easy to operate make SFX a tool that will change how you design sound. No matter what your experience, SFX makes it simple for you to focus on the art of sound design. You will no longer be shackled by the limitations of other sound playback equipment. While other devices struggle to playback one sound effect at a time, SFX can playback several effects simultaneously, all independent of each other. With certain sound cards, SFX can also route sound effects to multiple outputs.

*"For the first time in six years of being in theatre, I went to dinner at dinner break! I didn't have to come back until 15 minutes before the evening tech because I didn't have any notes to do - I had already done them!"*  
- Brian Peterson

## DESIGNED BY THEATRE PROFESSIONALS

SFX was designed for theatre by theatre professionals. Its drag-and-drop interface make manipulating cue lists as easy as a mouse click and allows you the time and freedom to design robust shows. Operators simply hit a GO button and are provided with status indicators and descriptive notes. No matter how complex the show or inexperienced the operator, using SFX is easy!

*"SFX rocks! I can't believe how much easier the new sound guy has it! Just last year, I ran three pro minidisc decks and a Yamaha board. This year we upgraded to SFX, and there's no going back!"*  
- Daniel Zawierucha

## KEY FEATURES:

- ▶ Layering of multiple sound effects
- ▶ Intuitive, cue list based interface
- ▶ Cue types include Wave Files, CD Tracks, Fade cues, Autofollows, Wait cues, and more!
- ▶ Informative cue descriptions and Notes to keep operators fully informed
- ▶ Modifying cue lists is easy, and making changes during tech immediate

*"We just did a production of Dracula where there were as many sound cues as lighting cues. The only difference was that the sound and music for the show were ready to run long before the lighting, thanks to SFX! It also enabled us to do things that we had only been dreaming about. Our TD and Director were amazed by how quickly changes could be made. In short, SFX is a wonder-product and a lifesaver."*

- Bryan Bledsoe

## SUGGESTED PRICE:

**SFX Standard: \$495**  
**SFX ProAudio: \$845**  
**SFX Show Control: \$845**  
**SFX Full Package: \$1195**

## REQUIREMENTS:

**Pentium III 500 MHz**  
**256 MB RAM, 8MB free hard drive**  
**Printer port, CD-ROM**  
**Windows 2000/Windows XP**  
**DirectX compatible sound card\***

\*Recommended sound cards:  
 Creative Labs Sound Blaster 2-channel cards  
 Echo Layla multichannel cards
