

19 May 2003

Overview:

We are pleased to announce an update and improvement to our lock off mechanism for MO yokes on all STUDIO 1K/ BAMBINO 2K and larger fresnels and PARS. The new mechanism is simple to install and provides superior lock off performance.

New Lateral thrust Bearings measure 27mmx16mmx6.5mm

The **NEW** system is consists of a Lock Off Knob and the new lateral thrust bearing as illustrated. It can be easily positioned as shown and will always work regardless of its orientation. This new mechanism will ship with all new production effective immediately. A new spares kit has been created using Part number 190/1 and this kit may be used to retro fit existing units in the field.

<p>Kit Number 190/1 Please note that each kit is composed of 6 pieces</p>	<p>New component is in stock Availability and price on request.</p>
