WM = wall-mounting RSJ = fixing B = barrel fixing

STAGE ACCESSORIES

CYCLORAMA CLOTHS

These provide a backing to the stage set and are important for large scale presentations.

1 Roller Type. Scenic canvas cloth, flameproofed, attached at top to timber batten and provided with a bottom roller. A pulley system is fitted complete with hauling rope so the cloth can be rolled or unrolled. Care must be taken to ensure adequate suspensions are available for top batten and a firm fixing for the cleat to which the hauling ropes are fastened.

2 Fixed type. Scenic canvas cloth, flameproofed, webbed across heading with tie tapes and provided with a bottom hem. Two barrels are included, one to which the cloth is tied off (top barrel) and one for insertion in the bottom hem (bottom barrel); when the cloth is suspended it hangs taut. The top barrel is fitted with suspension clamps and can either be attached for raising and lowering or fixed permanently in position.

NOTE: Cyclorama cloths can be provided with horizontal seams to minimise shadow. The material is flameproofed but needs priming before painting. Prices on application.

33 x 16 (10-058 x 4-877)		£87-50

STAGE FLOOR CLOTHS

To minimise noise, protect floors and reduce reflection of light from polished surfaces, a stage floor cloth may be fitted. A heavy duty flax canvas, double seamed, and designed to cover the acting area. Cloths can be eyeletted and supplied with pins and sockets, the latter fitted into the floor so the cloth is firmly secured. Alternatively cloths can be provided for loosely laying over the stage area. Material is flameproofed and prices can be quoted on receipt of dimensions. Cloth can be fitted if required.

Description	Size	Price each
	ft.	mt.
Double seamed	30 x 20 (9-144 x 6-096)	£103-00
Stage Floor Cloth	40 x 20 (12-19 x 6-096)	£132-20
