200W.	220/240V.	4000 HOURS	VERTICAL OR HORIZONTAL
300W.	220/240V.	2000 HOURS	HORIZONTAL
350W.	220/240V.	300 HOURS	HORIZONTAL
		Equivalent 500W.	
500W.	220/240V.	2000 HOURS	HORIZONTAL

SUB-KILOWATT FLOODLIGHTS

Made in England, these sub-kilowatt luminaires can be used for wide angle lighting of acting areas, back cloths and cycloramas.

They can be fitted with double ended Tungsten Halogen lamps of varying wattages giving added versatility.

Good lamp protection is given by the wire mesh guard and colour filters can be retained by means of a hinged locking frame. The barn doors fold flat over the front giving added lamp

protection during transit. Both filter holders and barn doors are fitted on single units as standard.

The overall construction is designed to give strength, light weight and low skin temperature.

There are three versions, single, three lamp and four lamp units available in each model.

The Floodlights are of rugged construction, and are finished in tough black texture epoxy paint.

TECHNICAL SPECIFICATION 150W. SERIES FLOODLIGHT

- * Available as a 1 - 3 or 4 lamp unit.
- * Filter Holder and barn doors fitted as standard on single units.
- * Safety chain can be supplied as an extra.
- * Fitted with 150W. 200/240V. linear Tungsten Halogen lamp.
- * Lamp can be operated in either vertical or horizontal plain.
- * Lamp life 4000 hours.

TECHNICAL SPECIFICATION 300W. SERIES FLOODLIGHT

- * Available as a 1 - 3 or 4 lamp unit.
- * Filter retainer, safety wire mesh screen and barn doors fitted as standard on single units.
- * Supplied without lamp but may be fitted with 200W., 300W., or 500W. Tungsten Halogen lamp.
- * Can be supplied with safety chain as extra.

NEW SPOTLIGHTS

PROFILE/FRESNEL/PLANO CONVEX SPOTLIGHTS FROM LIGHTOMATION

The M & T Series Spotlights are available in Profile, Fresnel or Plano Convex versions.

Access to the interior of all the units is through a hinged top cover making lamp replacement very speedy and simple. The trunion arm complete with locking knob allows the pan and tilt to be easily adjusted, and a new high efficiency reflector system achieves maximum brightness. Safety wire mesh is fitted to all units together with a safety chain retaining ring. Accessories available include, Barn Doors, Safety chain, colour wheel and ceiling mounting brackets.

M. Series

These are fitted with an M33 H.P.V. 250 Watt 24V lamp with a life of some 300 hours and a colour temperature of 3200° K. Besides being equivalent in light output to many far more powerful spotlights one major advantage is that the cost of the M33 H.P.V. lamp is some six times less expensive than equivalent 1000W C.P. Lamps.

T Series

These can be fitted with the T18 500W 240V or T26 650W 240V lamps.
