MANTRIX 2S WITH MEMORY DISCONTINUED

Mantrix with Memory is discontinued as of April 15, 1989. Obsoleting componetry and cost disadvantages vis a vis Lightboard M have forced the product life cycle to close on this console.

Service and spare parts will continue to be provided for the console to meet our customer requirements. From time to time single consoles may be available for sale because of the large installed base the console enjoys.

Any current order already placed in house has been accounted for and will be honored.

Please note that this action does not apply to Mantrix 2s without memory.

Regards,

Steve Norman
Product Manager
Dimming & Control
