▲ The Museum of Civilisation, Toronto, Canada.

## STRANDBOOK

Strand have designed the Strandbook to be a comprehensive catalogue of all Strand Lighting products, as well as a reference manual for anybody interested in stage, studio or architectural lighting

To help you find a known product there is a brand name index at the back. Alternatively, if you are not sure which product suits your needs, turn to the relevant section such as stage, television or architectural and browse through until you find what suits your requirements. Each product has an item number which you will need to use when making enquiries or placing an order with Strand.

The item number corresponds to the separate Price List. For example, to obtain the price of Cantata 18/32, (the item number is 22 618 32), turn to the Price List (which is arranged in exactly the same order as this catalogue), find the Cantata section, and then the 18/32 - this gives you the price for the luminaire.

Data sheets are available on all Strand and Quartzcolor luminaires, manual control desks, dimmer packs and racks, the smaller memory lighting systems, and associated accessories for both stage and studio use. Data sheets are also available for Architectural Lighting, including luminaires, controls and dimmers.
