The international leader for professional lighting control, now offering bi-directional reporting with the new EC90 intelligent, digital dimmer – featured on pages 10 & 11 of this catalogue

- A wide range of modules to permit custom configuration for studio or theatre application
- 999 dimming control channels plus an additional 99 for automated lights
- Control of up to 1536 dimmers
- Completely modular for custom configuration
- Up to 20 preset masters with LED displays, flash, boost and inhibit capability
- Full integration with EC90 for status and fault reporting to the lighting operator
- Full integrated control of PALS automated luminaires, including pan, tilt, colour, focus and iris
- Fully proportional patch
- Improved high resolution video displays
- Improved special effects
- Completely redesigned electronics for greater speed and data integrity

Accessories

Designer's Control, available for hard-wired or infra-red operation. Provides channel access, memory recording and playback facilities. **Supplied with a set of connectors, battery charger, and 13 amp socket**

07 550 02

Infra-red Receiver, for use with Designer's Control

07 552 03

Rigger's Control – a rugged hand-held controller for channel access during focusing. **Supplied with a set of connectors, battery charger and 13 amp socket**

07 540 05

Rigger's socket box

07 024 0T

Stalls or Studio Control – selected control modules may be housed in a portable desk for access to level setting and memory recording during rehearsals

Printer – provides hard copy printout of all recorded information. Now date and time stamped.

Geographic Button Mimic – a custom panel matching the circuit layout of the stage. Each button illuminates when the circuit is active and flashes while under control.
