

TEMPUS M24

The final product to be introduced at our April 83 Launch is in many ways the most interesting product we have introduced in years. The major challenge left to any manufacturer in our business is to produce a memory control system at a price everyone can afford.

Whilst accepting the importance of new lanterns to our business the glamour of a new control system always tends to create more excitement and this will probably be true of this launch.

Rank Strand's experience of supplying more than 1,000 memory systems Worldwide has enabled us to be the first major manufacturer in the market place with a low priced, full facility, memory control system. This system is TEMPUS M24.

TEMPUS M24 is available in 24, 48 and 60 channels with upto 185 cues (199 cues on some versions).

Also available with TEMPUS M24 is the TEMPUS M24 EX optional patch/effects desk thereby making TEMPUS M24 eminently suitable for use in the smaller light entertainment venues, clubs etc.

TEMPUS M24 has been designed for use with or without a VDU, alternatively with any 625/525 line domestic monochrome TV set.

In addition lighting plots can be transferred on to a standard home audio tape using any reasonable domestic cassette recorder.

Rank Strand do not propose to stock TV sets and/or recorders for use with M24.

IMPORTANT! Separately within this binder is detailed Rank Strand's service support policy for TEMPUS M24.
