

Strand architectural lighting systems. Built on over 75 years success in theatrical lighting.

Strand, the world leader in entertainment lighting, has drawn on unrivalled experience to develop an integrated range of luminaires, controls and dimmers specifically for interiors. So now you can create precisely controlled lighting for applications as diverse as restaurants, churches and retail display.

The range includes:

- Microdimmers for sophisticated 'scene setting'
- Multidim modular dimming system with a wide range of control station options
- Energy efficient halogen spotlights offering a range of styles and beam angles
- Minispots for precise beam shaping, focus, colour, image and effects projection
- Miniature downlights in three styles, with a glare-free darklighter version
- Finesse

wall-box dimmers for low voltage halogen lighting.

Strand now offer total capability in controlled lighting systems; from supplying luminaires, dimmers and controls to providing expert advice on system design and installation.
