

# The complete range of equipment stands and accessories for mobile applications and fixed installations

## POWER DRIVE

### TRUSS TOWER

Max. height 5.5m  
Max. load 130kg

#### FEATURES

360kg winch twin pawls and friction-brake for maximum safety.

Truss Tower also features:

Fail-safe device – prevents fall of truss in case of cable failure.

**PLUS FULL RANGE OF MOUNTING OPTIONS**

### POWER TOWER

Max. height 5.9m  
Max. load 160kg

### WINCH STANDS

All Powerdrive telescopic winch stands are self-contained, easily transported by one person and ruggedly constructed for trouble-free service.

#### SUPERHOIST

A self-contained three section flush base telescopic stand designed for single and multiple lighting and PA applications which can also be used in pairs to lift up to 10 metres of 12" square trussing.

#### LIGHTHOIST

A two-section stand designed as a heavy duty wind up version of our popular Ref. 40 tripod.

### STANDS

#### MIDHOIST

A two-section truss lifting tripod stand incorporating a twin safety screw locking system, which, with our hinged truss adaptors, allows an 8 metre span of trussing to be lifted.

#### TELEHOIST

A three-section tripod stand designed for single or multiple lighting and PA applications.

#### SCAN-STAND

A two-section stand designed for use with 'Scan' type lighting effects and large follow spots.
