

STUDIO COLOR

THE SKY'S

the limit

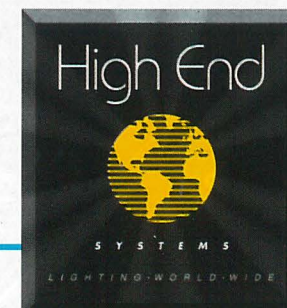

And the road goes on forever...

The Lightwave Research Studio Color™ automated wash luminaire colors your world with limitless creative possibilities. A rich palette of fixed colors and the most elegant, seamless color mixing system ever designed inspires you to new heights of artistic expression.

Studio Color also broadens your horizons with its unique beam shaping facilities. Frost, strobe, iris, selectable beam angle, and full DMX-512 compatibility make this luminaire the one you can't afford to pass up.

The convection cooled Studio Color features a daylight balanced MSR 575-2 lamp and computer optimized reflector which together create an optical system with unsurpassed light output. This exclusive optical design represents the dawn of a new era in intelligent lighting, and certainly a higher power to be reckoned with.

On the concert stage, in the theatre, or on the set—you'll breathe easier knowing you specified Studio Color.
