

# Electrical Safety is YOUR Responsibility

## Why Take Risks? Use Power Lock

Current European Regulations are clear that the individual manager, employer, owner or manufacturer must ensure that all reasonable steps are taken and all due diligence exercised when supplying electrical services or equipment for sale or rental. This could be YOU!

Power Lock is a single pole electrical connector that has been specifically designed for use in the entertainment industry. It offers peace of mind, by taking the risk out of supplying the high loads required for today's lighting & sound systems.
